- 1) Freewrite
- 2) Write about 3 discoveries you made about your writing process while composing the final draft of your essay, what do you think you achieved? What are you proud of? What will you improve upon in your next essay? What new ways of writing did you explore/essayer?

One of the discoveries I found is that I can somewhat write consistently. Another is I somewhat have good grammar. Finally, I can use complex word choices. What I want to improve in my writing is that I want to put more word choices and organize the structure of my writing so I can consistently write more often.
